<b>Student Comments</b>
<b>For Lab Leader:</b>
The lab leader was very understanding and was able to help all the students out when we were confused on certain points throughout the various chapter. She is a great lab leader!
You should definitely use your time effectively during the last labs before the final. I feel like we really didn't go over much. Possibly, in the second to last lab session, you could assign "homework", or assign a bunch of practice problems to do before your very last lab session. This would allow the student more time in the very last lab session to understanding concepts while you went over them (this would reduce the amount of time being wasted while waiting for people to send in answers)
The Lab Leader was a great teacher and has helped tremendously in all my math work but I feel that she spent too much time reviewing announcements thus giving us less time to focus on the material.
quick-paced at times
She was a very good teacher and tried her best to accommodate and adapt to our comments.
<b>For the Course:</b>
very rushed
<b>For Hawkes:</b>
It's hard to input answers because it wants it a certain way. For example if you put a 1x it marks it wrong because it wants x .
